SUMMARY

Full Stack Developer with hands-on experience building scalable web applications and a strong focus on backend development. Strong foundation in Java, Spring Boot, SQL, RESTful APIs, and Object-Oriented Programming, with experience designing backend services, developing CRUD operations, integrating relational databases, and implementing authentication and authorization. Also experienced in frontend development, providing a strong understanding of end-to-end application architecture, API integration, and full-stack development. Familiar with MVC architecture, dependency injection, exception handling, Git, Docker, and Agile development practices.

SKILLS SUMMARY

Programming Languages: Java, SQL, Python, JavaScript

Frontend: React.js , Next.js, Tailwind CSS , Responsive Design

Backend Development: Spring Boot, Spring MVC, REST API Development, MVC Architecture, CRUD Operations, Dependency Injection, Exception Handling, Middleware

Databases: SQL, PostgreSQL, Redis

Java Technologies: Core Java, OOP, Collections, Exception Handling, Java Streams, JDBC

Tools: Git, GitHub, Postman, VS Code

Software Engineering : Object-Oriented Programming ,Data Structures Algorithms, ,API Design, MVC Architecture

---

PROJECTS

KnowGrow AI — Adaptive Learning Intelligence Platform

- Designed and developed a full-stack adaptive learning platform using React, Next.js, FastAPI, PostgreSQL, and Redis.
- Built responsive user interfaces with reusable React components and Tailwind CSS.
- Developed secure REST APIs supporting authentication, course management, quizzes, and progress tracking.
- Implemented JWT-based authentication and role-based authorization.
- Designed relational database schemas and optimized SQL queries for efficient data retrieval.
- Containerized the application using Docker for consistent deployment.
- Followed modular architecture and API-first development practices.

Student Management REST API — Java & Spring Boot

- Developed a RESTful backend application using Java, Spring Boot, Spring MVC, and SQL for managing students, courses, and academic records.
- Designed and implemented REST APIs for CRUD operations with proper request validation, DTOs, exception handling, and HTTP status codes.

- Integrated the application with a relational database and designed normalized database schemas for efficient data storage and retrieval.
- Implemented JWT-based authentication and role-based authorization to secure backend APIs.
- Tested and documented APIs using Postman and managed the projects using Git and Github.

WORK EXPERIENCE

AI/ML Intern — Google Developer Student Club (GDSC)

Oct 2024 – Dec 2024

• Engineered end-to-end Machine Learning pipelines using Scikit-Learn for predictive analytics and classification tasks.

• Performed feature engineering, preprocessing, model training, evaluation, and hyperparameter optimization.

• Built reusable Python modules for data preprocessing and inference workflows.

• Collaborated in Agile development using Git-based version control and code reviews.

• Applied software engineering best practices to improve code quality and maintainability.

EDUCATION

B.Tech Artificial Intelligence and DataScience — **9.0 CGPA**
Dhanalakshmi Srinivasan Engineering College — Aug 2023 - May 2027

Marutham matric.Hr.Sec.School — **89.8%**
Bio Mathematics — Jun 2021 - May 2023

CERTIFICATES

- Machine Learning - Stanford & Deeplearning.ai
- Prompt Engineering — Google
- AI Essentials - Google
- Problem Solving — HackerRank
